MATERIAL UND VERSIGELUNG
MATERIALS AND PROTECTION

HOLZELEMENTE

Holzelemente für den Außenbereich werden aus FSC-zertifiziertem Iroko Holz gefertigt. Um eine zufriedenstellende Nutzung über viele Jahre zu gewährleisten, werden die natürlichen Eigenschaften des Holzes durch eine schützende Ölbehandlung oder eine Lackierung in verschiedenen Farben nachgebessert.

Für den Innenbereich kann das komplette Sortiment an Holzarten und Oberflächen verwendet werden, wie zum Beispiel: Furniere, Ölungen und Lackierungen einschließlich Klarlack.

TIMBER ELEMENTS

Timber elements for outdoor use are made of iroko wood (FSC Certificate). The natural characteristics of the wood are further enhanced by a protective oil treatment or painting (in variety of colours) to ensure satisfactory use for a number of years.

For internal use we can offer the full range of different types of wood and different finishes such as: veneers, oiling, and varnishing (including clear varnish).

EDELSTAHL

Es gibt eine Vielzahl an Legierungen für nicht rostende Edelstähle. Für die Herstellung des Stadt- und Parkmobiliars werden die beiden am besten geeigneten Edelstahlsorten verwendet:

304 (1.4301) - Profile aus diesem Stahl sind leicht formbar und verfügen über eine ausgezeichnete Schweißbarkeit, welche die Herstellung komplexer Designs, die Erzeugung von quadratischen Kanten und unsichtbarer Schweißnähte ermöglicht.

316L (1.4404) - Kann dort eingesetzt werden, wo eine noch höhere Korrosionsbeständigkeit erforderlich ist, wie zum Beispiel in Küstenregionen oder in Regionen wo im Winter häufig Streusalz zum Einsatz kommt.

STAINLESS STEEL

There is a wide range of alloys for stainless steels. The two most suitable stainless steel grades are used for the manufacture of street and park furniture:

304 (1.4301) - Profiles made from this steel type are easily formable and have excellent weldability. This allows the production of complex designs, square edges and invisible welds.

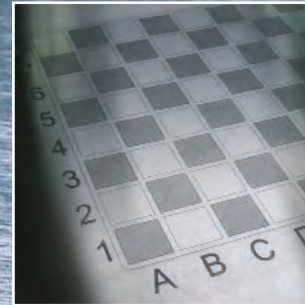

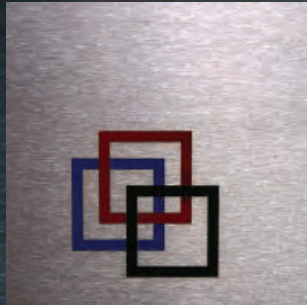

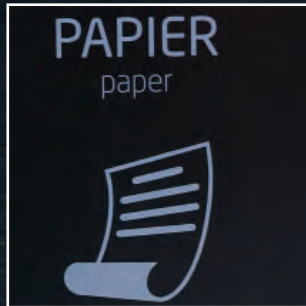

316L (1.4404) - Can be used where even higher corrosion resistance is required, such as in coastal regions or in regions where road salt is frequently used in winter.

EDELSTAHL - OBERFLÄCHENVEREDELUNG

Für das Stadt- und Parkmobiliar werden folgende Edelstahl-Oberflächenveredelungen angeboten:

Schleifen (gebürstete Oberfläche), Polieren (Hochglanzpolitur) und Abbeizen (matte Oberfläche).

Zusätzliche Logos oder Zeichen können bei Bedarf gelasert oder geätzt werden.

STAINLESS STEEL - SURFACE FINISHING

The Following Stainless Steel Surface Finishes Are Offered For Street And Park Furniture: Grinding (Brushed Surface),

Polishing (High Gloss Polish) And Pickling (Matt Surface).

Additional Logos Or Signs Can Be Lasered Or Etched If Required.

GRANIT

Granit ist eine optisch ansprechende Alternative zu Beton. Aufgrund der hervorragenden physikalischen Eigenschaften (Bruchfestigkeit, geringe Wasseraufnahmefähigkeit, Abriebfestigkeit und Frostbeständigkeit) eignet es sich sehr gut für den Einsatz in Stadt- und Parkmobiliar. Granit zeichnet sich darüberhinaus durch ausgezeichnete ästhetische Qualitäten aus, einschliesslich einer breiten Farbpalette und einer Vielzahl von Oberflächen.

GRANITE

Granite is a visually appealing alternative to concrete. Its excellent physical characteristics (resistance to fracture, low water absorption, abrasion resistance and frost resistance) make it particularly suitable for use in street and park furniture. Granite also has excellent aesthetic qualities, including a wide range of colours and finishes.

GABIONEN

Gabionen sind Drahtkörbe, die mit Natursteinen, Holz, oder ähnlichen natürlichen Materialien befüllt sind. Mit dem Einsatz dieser besonderen Gestaltungselemente werden außergewöhnliche Sitzgelegenheiten geschaffen.

GABIONS

Gabions are wire baskets that are filled with natural stone, wood, etc. With the use of these special design elements, extraordinary seating areas are created.

BAUSTAHL

Der verwendete Baustahl S235Jr (St3S) entspricht den ISO-Normen.

MILD STEEL

The mild steel S235JR (ST3S) used; complies with ISO standards.

FEUERVERZINKUNG

Alle Elemente aus Baustahl sind verzinkt, um einen Korrosionsschutz zu gewährleisten.

Folgende Verzinkungsverfahren kommen zur Anwendung:
Feuerverzinkung, durch Eintauchen in geschmolzenes Zink bei etwa 450 °C;
Galvanische Verzinkung. Unebenheiten und Versickerungen werden von Hand entfernt.

ZINC GALVANIZING

All mild steel elements are zinc plated to ensure corrosion protection.

the following processing methods are used:
Hot-dip galvanizing (by immersion in molten zinc at about 450 °C), electrogalvanizing.
Uneven surfaces and seepage are removed by hand.

PULVERBESCHICHTUNG POWDER COATING

Die Pulverbeschichtung bietet zusätzlichen Korrosionsschutz und wertet gleichzeitig das Erscheinungsbild des Produkts auf. Eine spezielle Vorbereitung der Oberfläche vor der Lackierung (Polymerisation) erhöht die Farbhaftung auf dem Zink deutlich. Es werden Fassadenfarben verwendet (alle mit Baukonformitätszertifikaten), die für den Einsatz unter extremen Bedingungen geeignet sind. Eine komplette RAL-Farbpalette ist verfügbar.

The powder coating provides additional corrosion protection, and at the same time enhances the appearance of the product. A special preparation of the surface prior to painting (polymerization) significantly increases the adhesion of the paint to the zinc. Facade paints are used (all with construction conformity certificates) that are suitable for use in extreme conditions. A complete RAL colour range is available.

CORTENSTAHL

Cortenstahl (oft auch als Corten bezeichnet) ist ein witterungsbeständiger Kupfer-Chrom legierter Stahl, der im Vergleich zu anderen, unlegierten Stählen eine höhere Widerstandsfähigkeit gegen atmosphärische Verwitterung aufweist. Seine chemische Zusammensetzung fördert die frühzeitige Bildung einer fest haftenden Schutzschicht aus Rost, wenn er der Witterung ausgesetzt ist. Die Schutzschicht aus Corten entwickelt sich beständig weiter und regeneriert sich im Laufe der Zeit, indem sie auf die Schadstoffe in der Atmosphäre reagiert. Die Vorteile dieses Stahls sind offenkundig: Selbstschützender Stahl ist wirtschaftlich, langlebig und leicht recyclebar.

CORTEN STEEL

Corten steel (often referred to as corten) is a weather-resistant copper-chromium alloy steel that has a higher resistance to atmospheric weathering than other plain steels. Its chemical composition promotes the early formation of a firmly adhering protective layer of rust when exposed to the weather. The protective layer of corten continues to develop and regenerate over time, reacting to pollutants in the atmosphere. The advantages of this steel are obvious: self-protecting steel is economical, durable and easily recyclable.

BETON

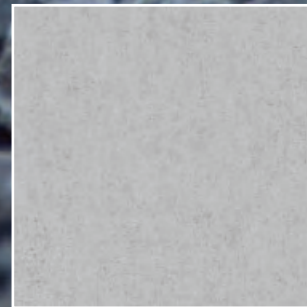

Folgende Betonarten werden für die Herstellung der Produkte verwendet: Waschbeton, modifizierter Beton und Sichtbeton. Viele verschiedene Arten von Aggregatoberflächen bieten zahlreiche Möglichkeiten der Raumgestaltung. Diese Produkte haben eine Garantie von 10 Jahren.

CONCRETE

The following types of concrete are used for the manufacture of the products: Washed concrete, modified concrete and exposed concrete. Many different types of aggregate surfaces offer numerous possibilities for the design of outdoor spaces. These products have a 10-year warranty.
